Back-End Developer (full-time)

Innoloft is establishing a digital platform to accelerate innovation across all technology sectors. We achieve this by connecting the right business contacts that are developing innovative products and ideas, all in our platform innoloft.com. Our core user groups are startups, investors and established companies.

Startups want to grow, investors need investment cases and corporates need new technologies, ideas or business models. If Spotify can suggest the music you might like, we can also propose the right people to bring a startup's vision further.

And we're growing! You'll be developing our backend structure and designing an innovative microservice architecture in a team of passionate developers from multicultural backgrounds. Are you looking for a great vision, a challenging job, a motivated team and flexible working hours? Then join us!

Your skills and tasks

Desirable knowledge

Interests in the field of:
